

NO NEW TOWERS IN OUR BACKYARDS!

A radio tower that will loom over Mount Hope is already under construction!

Construction needs to stop and a new location selected.

- 1. EMS.** We fully support the project to improve the EMS communication system.
- 2. TOWER LOCATION.** There are several other suitable locations for the tower that do not damage our ridgeline view further. The new tower will become visible from many more neighborhoods than the existing structures.
- 3. COUNTY BULLYING.** The county has overridden and ignored the Town of Mount Hope zoning laws protecting the ridge view. The county did not notify local residents, and even the Mount Hope Town Board was not aware of the project's timeline.
- 4. PROPERTY VALUES.** The tower lowers property values and your tax dollars are paying for it.

The Mount Hope radio tower places an imposing industrial structure on our ridge line and could also pose safety risks to you and your family.

If our town allows this tower to be built in the current location, it could be just the beginning of a bad trend.

It would pave the way for future towers, even taller, to be built in the same location. Additionally, these towers are capable of carrying a wide variety of technologies. Some, such as 5g, have been studied and are known to be dangerous.

Once the tower is built, we, the people of this town, have no power to control additional towers being built nor what technology goes on these towers in the future.

Our elected officials need to stand up for our town. Tell them how you feel.
